QuickSpecs

Overview

HPE FlexFabric 5900 Switch Series

Models

HPE FlexFabric 5900AF 48XG 4QSFP+ Switch	JC772A
HPE FlexFabric 5900AF 48G 4XG 2QSFP+ Switch	JG510A
HPE FlexFabric 5900AF 48XGT 4QSFP+ Switch	JG336A
HPE FlexFabric 5900 48XG 4QSFP+ Short Form Factor Switch	JH337A

Product overview

The HPE FlexFabric 5900 Switch Series is a family of high-density, ultra-low-latency, top-of-rack (ToR) switches that is part of the Hewlett Packard Enterprise (HPE) FlexNetwork architecture's HPE FlexFabric solution.

Ideally suited for deployment at the server access layer of large enterprise data centers, the HPE FlexFabric 5900 Switch Series is also powerful enough for deployment at the data center core layer of medium-sized enterprises. With the increase in virtualized applications and server-to-server traffic, customers now require ToR switch innovations that will meet their needs for higher-performance server connectivity, convergence of Ethernet and storage traffic, the capability to handle virtual environments, and ultra-low-latency all in a single device.

Key features

- Cut-through with ultra low latency and wire speed
- HPE Intelligent Resilient Fabric (IRF) for virtualization and two-tier architecture
- High 1/10GbE ToR port density with 40 GbE uplinks
- IPv6 support in ToR with full L2/L3 features
- Convergence ready with DCB, FCoE, and TRILL

Features and benefits

Quality of Service (QoS)

Powerful QoS features:

Flexible classification

creates traffic classes based on access control lists (ACLs), IEEE 802.1p precedence, IP, and DSCP or Type of Service (ToS) precedence; supports filter, redirect, mirror, remark, and logging

Feature support

provides support for Strict Priority Queuing (SP), Weighted Fair Queuing (WFQ), Weighted Deficit Round Robin (WDRR), SP+WDRR together, configurable buffers, Explicit Congestion Notification (ECN), and Weighted Random Early Detection (WRED)

Data center optimized

Flexible high port density

the HPE FlexFabric 5900 Switch Series enables scaling of the server edge with 1 GbE and 10GbE ToR deployments to new heights with high-density 48-port solutions delivered in a 1RU design; the high server port density is backed by 40 GbE QSFP+ uplinks to deliver the availability of needed bandwidth for demanding applications; each 40 GbE QSFP+ port can also be configured as four 10GbE ports by using a 40-GbE-to-10GbE splitter cable

High-performance switching

cut-through and nonblocking architecture delivers low latency (~1 microsecond for 10GbE) for very demanding enterprise applications; the switch delivers high-performance switching capacity and wire-speed packet forwarding

Higher scalability

Hewlett Packard Enterprise (HPE) Intelligent Resilient Fabric (IRF) technology simplifies the architecture of server access networks; up to nine HPE FlexFabric 5900 switches can be combined to deliver unmatched scalability of virtualized access layer switches and flatter two-tier networks using IRF, which reduces cost and complexity

Advanced modular operating system

Comware v7 software's modular design and multiple processes bring native high stability, independent process monitoring, and restart; the OS also allows individual software modules to be upgraded for higher availability and supports enhanced serviceability functions like hitless software upgrades with single-chassis ISSU

SPB, TRILL, and EVB/VEPA

Shortest Path Bridging (SPB) and Transparent Interconnection of Lots of Links (TRILL) is supported to increase the scale of enterprise data centers; Edge Virtual Bridging with Virtual Ethernet Port Aggregator (EVB/VEPA) provides connectivity into the virtual environment for a data center-ready environment

• Reversible airflow

enhanced for data center hot-cold aisle deployment with reversible airflow—for either front-to-back or back-to-front airflow

• Redundant fans and power supplies

1+1 internal redundant and hot-pluggable power supplies and dual fan trays enhance reliability and availability

• Lower OPEX and greener data center

provide reversible airflow and advanced chassis power management

• Data Center Bridging (DCB) protocols

provides support for IEEE 802.1Qbb Priority Flow Control (PFC), Data Center Bridging Exchange (DCBX), and IEEE 802.1Qaz Enhanced Transmission Selection (ETS) for converged applications

FCoE support

provides support for Fibre Channel over Ethernet (FCoE), including expansion, fabric, trunk VF and N ports, and aggregation of E-port and N-port virtualization; fabric services such as name server, registered state change notification, and login services; per-VSAN fabric services, FSPF, soft and hard zoning, Fibre Channel traceroute, ping, debugging, and FIP snooping

Jumbo frames

with frame sizes of up to 10,000 bytes on Gigabit Ethernet and 10-Gigabit ports, allows high-performance remote backup and disaster-recovery services to be enabled

Manageability

• Full-featured console

provides complete control of the switch with a familiar CLI

Troubleshooting

- Ingress and egress port monitoring: enable network problem solving
- Traceroute and ping: enable testing of network connectivity

• Multiple configuration files

allow multiple configuration files to be stored to a flash image

sFlow (RFC 3176)

provides wire-speed traffic accounting and monitoring

• SNMP v1, v2c and v3

facilitate centralized discovery, monitoring, and secure management of networking devices

• Out-of-band interface

isolates management traffic from user data plane traffic for complete isolation and total reachability, no matter what happens in the data plane

• Remote configuration and management

is available through a secure command-line interface (CLI) over Telnet and SSH; Role-Based Access Control (RBAC) provides multiple levels of access; Configuration Rollback and multiple configurations on the flash provide ease of operation; remote visibility is provided with sFlow and SNMP v1/v2/v3, and is fully supported in HPE Intelligent Management Center (IMC)

ISSU and hot patching

provides hitless software upgrades with single-unit In Services Software Upgrade (ISSU) and hitless patching of the modular operating system

Autoconfiguration

provides automatic configuration via DHCP autoconfiguration, NETCONF and Python Scripting

• Network Time Protocol (NTP), Secure Network Time Protocol (SNTP) and Precision Time Protocol (PTP) synchronize timekeeping among distributed time servers and clients; keep consistent timekeeping among all clock-dependent devices within the network so that the devices can provide diverse applications based on the consistent time. Precision Time Protocol (PTP) IEEE 1588v2 Compliant

Resiliency and high availability

HPE Intelligent Resilient Fabric (IRF) technology

enables an HPE FlexFabric to deliver resilient, scalable, and secured data center networks for physical and virtualized environments; groups up to nine HPE FlexFabric 5900 switches in an IRF configuration, allowing them to be configured and managed as a single switch with a single IP address; simplifies ToR deployment and management, reducing data center deployment and operating expenses

• IEEE 802.1w Rapid Convergence Spanning Tree Protocol

increases network uptime through faster recovery from failed links

• IEEE 802.1s Multiple Spanning Tree

provides high link availability in multiple VLAN environments by allowing multiple spanning trees

Per VLAN Spanning Tree (PVST)

provides high link availability in multiple VLAN environments by allowing spanning tree instances per VLAN

Virtual Router Redundancy Protocol (VRRP)

allows groups of two routers to dynamically back each other up to create highly available routed environments

Hitless patch upgrades

allows patches and new service features to be installed without restarting the equipment, increasing network uptime and facilitating maintenance

Ultrafast protocol convergence (< 50 ms) with standard-based failure detection—Bidirectional Forwarding Detection (BFD)

enables link connectivity monitoring and reduces network convergence time for RIP, OSPF, BGP, IS-IS, VRRP, MPLS, and IRF

Device Link Detection Protocol (DLDP)

monitors link connectivity and shuts down ports at both ends if unidirectional traffic is detected, preventing loops in STP-based networks

• Graceful restart

allows routers to indicate to others their capability to maintain a routing table during a temporary shutdown and significantly reduces convergence times upon recovery; supports OSPF, BGP, and IS-IS

Layer 2 switching

MAC-based, Protocol-based, and Subnet-based VLANs

provides granular control and security; uses RADIUS to map a MAC address/user to specific VLANs, map protocols to specific VLANs or subnets to specific VLANs.

Address Resolution Protocol (ARP)

supports static, dynamic, and reverse ARP and ARP proxy

Flow Control

IEEE 802.3x Flow Control provides intelligent congestion management via PAUSE frames

• Ethernet Link Aggregation

provides IEEE 802.3ad Link Aggregation of up to 128 groups of 16 ports; support for LACP, LACP Local Forwarding First, and LACP Short-time provides a fast, resilient environment that is ideal for the data center

Spanning Tree Protocol (STP)

STP (IEEE 802.1D), Rapid STP (RSTP, IEEE 802.1w), and Multiple STP (MSTP, IEEE 802.1s)

VLAN support

provides support for 4,096 VLANs based on port, MAC address, IPv4 subnet, protocol, and guest VLAN; supports VLAN mapping

IGMP support

provides support for IGMP Snooping, Fast-Leave, and Group-Policy; IPv6 IGMP Snooping provides Layer 2 optimization of multicast traffic

DHCP support at Layer 2

provides full DHCP Snooping support for DHCP Snooping Option 82, DHCP Relay Option 82, DHCP Snooping Trust, and DHCP Snooping Item Backup

Layer 3 services

Address Resolution Protocol (ARP)

determines the MAC address of another IP host in the same subnet; supports static ARPs; gratuitous ARP allows detection of duplicate IP addresses; proxy ARP allows normal ARP operation between subnets or when subnets are separated by a Layer 2 network

• Dynamic Host Configuration Protocol (DHCP)

simplifies the management of large IP networks and supports client and server; DHCP Relay enables DHCP operation across subnets

• Operations, administration and maintenance (OAM) support

provides support for Connectivity Fault Management (IEEE 802.1AG) and Ethernet in the First Mile (IEEE 802.3AH); provides additional monitoring that can be used for fast fault detection and recovery

Layer 3 routing

• Virtual Router Redundancy Protocol (VRRP) and VRRP Extended

allow quick failover of router ports

Policy-based routing

makes routing decisions based on policies set by the network administrator

• Equal-Cost Multipath (ECMP)

enables multiple equal-cost links in a routing environment to increase link redundancy and scale bandwidth

Layer 3 IPv4 routing

provides routing of IPv4 at media speed; supports static routes, RIP and RIPv2, OSPF, BGP, and IS-IS

Open shortest path first (OSPF)

delivers faster convergence; uses this link-state routing InteriorGateway Protocol (IGP), which supports ECMP, NSSA, and MD5 authentication for increased security and graceful restart for faster failure recovery

• Border Gateway Protocol 4 (BGP-4)

delivers an implementation of the Exterior Gateway Protocol (EGP) utilizing path vectors; uses TCP for enhanced reliability for the route discovery process; reduces bandwidth consumption by advertising only incremental updates; supports extensive policies for increased flexibility; scales to very large networks

• Intermediate system to intermediate system (IS-IS)

uses a path vector Interior Gateway Protocol (IGP), which is defined by the ISO organization for IS-IS routing and extended by IETF RFC 1195 to operate in both TCP/IP and the OSI reference model (Integrated IS-IS)

• Static IPv6 routing

provides simple manually configured IPv6 routing

Dual IP stack

maintains separate stacks for IPv4 and IPv6 to ease the transition from an IPv4-only network to an IPv6-only network design

Routing Information Protocol next generation (RIPng)

extends RIPv2 to support IPv6 addressing

OSPFv3

provides OSPF support for IPv6

• BGP+

extends BGP-4 to support Multiprotocol BGP (MBGP), including support for IPv6 addressing

IS-IS for IPv6

extends IS-IS to support IPv6 addressing

IPv6 tunneling

allows IPv6 packets to traverse IPv4-only networks by encapsulating the IPv6 packet into a standard IPv4 packet; supports manually configured, 6to4, and Intra-Site Automatic Tunnel Addressing Protocol (ISATAP) tunnels; is an important element for the transition from IPv4 to IPv6

Policy routing

allows custom filters for increased performance and security; supports ACLs, IP prefix, AS paths, community lists, and aggregate policies

• Bidirectional Forwarding Detection (BFD)

enables link connectivity monitoring and reduces network convergence time for RIP, OSPF, BGP, IS-IS, VRRP, MPLS, and IRF

Multicast Routing

provides robust support of multicast protocols PIM-SM, PIM-DM, PIM-SSM and PIM-BIDIR

• Layer 3 IPv6 routing

provides routing of IPv6 at media speed; supports static routing, RIPng, OSPFv3, BGP4+ for IPv6, and IS-ISv6

Additional information

Green IT and power

improves energy efficiency through the use of the latest advances in silicon development; shuts off unused ports and utilizes

variable-speed fans, reducing energy costs

• Low power consumption

is rated to have one of the lowest power usages in the industry by Miercom independent tests

Management

USB support

File copy

allows users to copy switch files to and from a USB flash drive

Multiple configuration files

can be stored to the flash image

• SNMPv1, v2c, and v3

facilitate centralized discovery, monitoring, and secure management of networking devices

Network Time Protocol (NTP)

synchronizes timekeeping among distributed time servers and clients; keeps timekeeping consistent among all clock-dependent devices within the network so that the devices can provide diverse applications based on the consistent time

• Out-of-band interface

isolates management traffic from user data plane traffic for complete isolation and total reachability, no matter what happens in the data plane

Port mirroring

enables traffic on a port to be simultaneously sent to a network analyzer for monitoring

• Remote configuration and management

is available through a command-line interface (CLI)

• IEEE 802.1AB Link Layer Discovery Protocol (LLDP)

advertises and receives management information from adjacent devices on a network, facilitating easy mapping by network management applications

• sFlow (RFC 3176)

provides scalable ASIC-based wirespeed network monitoring and accounting with no impact on network performance; this allows network operators to gather a variety of sophisticated network statistics and information for capacity planning and real-time network monitoring purposes

• Command authorization

leverages RADIUS to link a custom list of CLI commands to an individual network administrator's login; an audit trail documents activity

• Dual flash images

provide independent primary and secondary operating system files for backup while upgrading

• Command-line interface (CLI)

provides a secure, easy-to-use CLI for configuring the module via SSH or a switch console; provides direct real-time session visibility

Logging

provides local and remote logging of events via SNMP (v2c and v3) and syslog; provides log throttling and log filtering to reduce the number of log events generated

Management interface control

provides management access through a modem port and terminal interface, as well as in-band and out-of-band Ethernet ports; provides access through terminal interface, Telnet, or secure shell (SSH)

• Industry-standard CLI with a hierarchical structure

reduces training time and expenses, and increases productivity in multivendor installations

Management security

restricts access to critical configuration commands; offers multiple privilege levels with password protection; ACLs provide Telnet and SNMP access; local and remote syslog capabilities allow logging of all access

• Information center

provides a central repository for system and network information; aggregates all logs, traps, and debugging information generated by the system and maintains them in order of severity; outputs the network information to multiple channels based on user-defined rules

Network management

HPE Intelligent Management Center (IMC) centrally configures, updates, monitors, and troubleshoots

• Remote intelligent mirroring

mirrors ingress/egress ACL-selected traffic from a switch port or VLAN to a local or remote switch port anywhere on the network

Security

Access control lists (ACLs)

provide IP Layer 3 filtering based on source/destination IP address/subnet and source/destination TCP/UDP port number

RADIUS/TACACS+

eases switch management security administration by using a password authentication server

Secure shell

encrypts all transmitted data for secure remote CLI access over IP networks

• IEEE 802.1X and RADIUS network logins

control port-based access for authentication and accountability

Port security

allows access only to specified MAC addresses, which can be learned or specified by the administrator

Convergence

• LLDP-MED (Media Endpoint Discovery)

is a standard extension of LLDP that stores values for parameters such as QoS and VLAN to automatically configure network devices such as IP phones

Warranty and support

1-year warranty

see http://www.hpe.com/networking/warrantysummary for warranty and support information included with your product purchase.

• Software releases

to find software for your product, refer to http://www.hpe.com/networking/support; for details on the software releases available with your product purchase, refer to http://www.hpe.com/networking/warrantysummary

Configuration Rules

Note 1 Fan Trays cannot be mixed in the same switch enclosure

Note 3 Only supported on JC772A and JG510A.

Only supported on JC772A, JG510A and JG336A. Note 4

Remarks: Watson Blue Text:

If there is any empty space below the switch in a rack when using Back to Front Fan Trays, JC682A, the rack will receive an Air Plenum kit that takes up 1U of additional space in the rack. The Air Plenum kit is not required on fully configured racks. This only applies for CTO Rack Level Integration. The Air Plenum Kit is a non-saleable SKU, and is brought in automatically for CTO Factory Rack Level Integration.

HPE FlexFabric 5900AF 48XG 4QSFP+ Switch (JC772A)

I/O ports and slots 48 fixed 1000/10000 SFP+ ports

4 QSFP+ 40-GbE ports

Additional ports and

1 RJ-45 serial console port

slots

1 RJ-45 out-of-band management port

1 USB 2.0

Power supplies

2 power supply slots 1 minimum power supply required (ordered separately)

Fan tray 2 fan tray slots

The customer must order fan trays, as fan trays are not included with the switch. This system requires

two same-direction airflow fan trays to function properly. The system

should not be operated with only one fan tray for more than 24 hours. The system should not be operated without a fan tray for more than two minutes. The system should not be operated outside of

the temperature range of 32°F (0°C) to 113°F (45°C). Failure to comply with these operating

requirements may void the product warranty.

Physical characteristics Dimensions 17.32(w) x 25.98(d) x 1.72(h) in (43.99 x 65.99 x 4.37 cm)

Weight 28.66 lb (13 kg) shipping weight

Memory and processor 512 MB flash; Packet buffer size: 9 MB, 2 GB SDRAM

Performance 10 Gbps Latency < 1.5 μs (64-byte packets)

Throughput up to 952 Mpps **Routing/Switching** 1280 Gbps

capacity

Routing table size 16000 entries (IPv4), 8000 entries (IPv6)

MAC address table size 128000 entries

Environment Operating temperature $32^{\circ}F$ to $113^{\circ}F$ (0°C to $45^{\circ}C$)

Operating relative

humidity

10% to 90%, noncondensing

Acoustic Low-speed fan: 65.7 dB, High-speed fan: 70.6 dB

Electrical characteristics Frequency 50/60 Hz

Maximum heat

dissipation

887 BTU/hr (935.79 kJ/hr)

Voltage 100 - 240 VAC, rated

-40 to -60 VDC, rated

(depending on power supply chosen)

Notes Idle power is the actual power consumption of the device with no ports

connected.

Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all

modules populated.

should not be operated with only one fan tray for more than 24 hours. The system should not be operated without a fan tray for more than two minutes. The system should not be operated outside of the temperature range of 32°F (0°C) to 113°F (45°C). Failure to comply with these operating

requirements may void the product warranty.

Physical characteristics Dimensions $17.32(w) \times 25.98(d) \times 1.72(h) \text{ in } (43.99 \times 65.99 \times 4.37 \text{ cm})$

Weight 28.66 lb (13 kg) shipping weight

Memory and processor 512 MB flash; Packet buffer size: 9 MB, 2 GB SDRAM

Performance 10 Gbps Latency $< 1.5 \mu s (64-byte packets)$

Throughput up to 952 Mpps **Routing/Switching** 1280 Gbps

capacity

Routing table size 16000 entries (IPv4), 8000 entries (IPv6)

MAC address table size 128000 entries

Environment Operating temperature 32°F to 113°F (0°C to 45°C)

Operating relative

humidity Acoustic 10% to 90%, noncondensing

Acoustic Low-speed fan: 65.7 dB, High-speed fan: 70.6 dB

Electrical characteristics Frequency 50/60 Hz

Maximum heat dissipation

887 BTU/hr (935.79 kJ/hr)

Voltage 100 - 240 VAC, rated

-40 to -60 VDC, rated

(depending on power supply chosen)

Maximum power rating 260 W Idle power 200 W

Notes Idle power is the actual power consumption of the device with no ports

connected.

Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all

modules populated.

Enterprise sales office.

HPE X120 1G Ports SFP RJ45 T Connectivity

1 RJ-45 1000BASE-T port (IEEE 802.3ab Type 1000BASE-T)

Connector type RJ-45

Accessory Product Details

Transceiver (JD089B)	Physical characteristics	Dimensions	2.71(d) x 0.54(w) x 0.55(h) in. (6.88 x 1.37 x 1.4 cm)
		Full configuration weight	0.07 lb. (0.03 kg)
A small form	Electrical	Power consumption typical	0.8 W
factor pluggable characteristics (SFP) Gigabit	characteristics	Power consumption maximum	1.0 W
1000Base-T transceiver that provides a full duplex Gigabit solution up to 100m on a Cat- 5+ cable.	Cabling	Cable type: 1000BASE-T: Category 5 (5E or better recommended), 100 Ù differential 4-pair unshielded twisted pair (UTP) or shielded twisted pair (STP) balanced, complying with IEEE 802.3ab 1000BASE-T; Maximum distance: • 100m	
	Services	Refer to the Hewlett Packard Enterprise sales website at: http://www.hpe.com/networking/services for details on the service-level descriptions and product numbers. For details about services and response times in your area, please contact your local Hewlett Packard Enterprise sales office.	

Summary of Changes

Date	Version History	Action	Description of Change
04-Feb-2019	Version 38	Changed	Removed Box Level CTO SSP Section and logic from
		J	menu and configurators
21-Sep-2018	Version 37	Changed	Recommended and Extended markings removed from the
·			document. Features and benefits updated
06-Aug-2018	Version 36	Changed	Configuration section updated: Added 10G AOC Cable
3			compatibility
07-May-2018	Version 35	Changed	Configuration section updated
06-Mar-2017	Version 34	Added	SKUs added: JL437A, JL438A, JL439A
11-Nov-2016	Version 33	Removed	Removed not supported transceivers: JD098B; JD099B
19-Aug-2016	Version 32	Changed	Configuration section updated (#AC3 option added)
01-Aug-2016	Version 31	Added	SKUs added: JL287A, JL288A, JL289A, JL290A, JL291A,
3			JL292A, JL250A, JL286A
		Changed	Overview and Technical Specifications updated.
06-June-2016	Version 30	Changed	Document name changed to HPE FlexFabric 5900 Switch
			Series.
			Product description updated.
15-Apr-2016	Version 29	Changed	SKUs descriptions updated on all the document.
16-Feb-2016	Version 28	Added	SKU added: JL251A
		Changed	Overview, Technical Specifications and Accessories
			updated,
08-Jan-2016	Version 27	Changed	Warranty and support updated
12-Oct-2015	Version 26	Changed	Overview, Technical Specifications and Accessories
			updated,
12-Dec-2014	Version 25	Removed	Deleted SKU JG325A
01-Dec-2014	Version 24	Added	Accessories section added
		Changed	Changes made on the entire document
09-June-2014	Version 23	Changed	Overview section revised.
31-Mar-2014	Version 22	Changed	Transceivers were revised.
19-Mar-2014	Version 21	Changed	Product descriptions, Transceivers, and notes were
			revised in Configuration.
04-Mar-2014	Version 20	Changed	Transceivers and Switch Options were revised.
25-Feb-2014	Version 19	Changed	Transceivers and Switch Options were revised.
18-Feb-2014	Version 18	Added	HPE FF 5900CP-48XG -4QSFP+ Switch was added to
			Configuration.
12-Nov-2013	Version 17	Changed	Build to Order, Box Level Integration CTO Models, Rack
			Level Integration CTO Models, Internal Power Supplies,
			and Switch Options were revised.
14-Oct-2013	Version 16	Added	Added a new Transceiver in two locations in the
			Configuration section.
09-Aug-2013	Version 15	Changed	Configuration as revised.
19-Jul-2013	Version 14	Changed	Configuration as revised.
02-Jul-2013	Version 13	Changed	The description of model JG336A was corrected
			throughout.
12-Jun-2013	Version 9	Changed	Build-to-Order was revised.
10-Jun-2013	Version 8	Changed	Configuration was revised.
25-Mar-2013	Version 7	Added	Added Part numbers and descriptions to the following
			Sections: Build to Order, Box Level Integration CTO
			Models, Rack Level Integration CTO Models , Switch
			Options Added Notes 3, and 4 to the Switch Options
			Section
		Deleted	Deleted several part numbers to the Standards and
			Protocols Section

Summary of Changes

27-Feb-2013	Version 6	Changed	The formatting of the new Configuration section was revised.
19-Feb-2013	Version 5	Added Changed	The configuration section was added. Line art was added. Product overview, Features and benefits, Model specifications, and Accessories were revised.
04-Dec-2012	Version 3	Changed	Updated Features and Benefits and made minor updates to the model specifications and accessories.
02-Apr-2011	Version 2	Changed	Part number was revised.
16-Nov-2011	Version 1	Created	Document creation
