HPE SATA Drives

NOTE: New web links to Hard Drive Firmware information and downloads

For the hard drive models that have a firmware update downloadable file from HPE, the latest version is listed and a link is now provided to the HPE Support Center search page for the hard drive model number firmware files. Enter the hard drive model number,(found in the far left column of this page), into the HPESC search by keyword text box.

[Click here to go to HPESC home page](#) .

NOTE: New ROHS drives and part numbers

[Click here to view the HPE PartSurfer webpage](#) to find the latest RoHS compliance information. When locating RoHS information, you must use the Option part number for the hard drives or the sales order number for a system that the hard drive is used in. You can find the sales order numbers in the Product QuickSpecs or on the Standard Models page.

By using the spare part number in PartSurfer, it will not provide any RoHS information. But a list of system models and option kits may be provided. Select one of the option kits or system models to obtain RoHS information on the hard drive spare part number. A parts list will then be shown from the option kit or system selected that includes the hard drive spare part number.

NOTE: A hard drive model can be used in multiple products with one assembly part number, but the spare and option parts may differ. For more information on the part number compatibility, Engineer should refer the Product Supported Documentation prior to dispatch and avoid any system damage.
