Product Description

The Juniper Networks® Dual-port Synchronous Serial PIM provides the physical connection to serial network media types, receiving incoming packets from the network and transmitting outgoing packets to the network. The Dual-port Synchronous Serial PIM is equipped with a dedicated network processor that forwards incoming data packets to the Routing Engine, and receives outgoing data packets from the Routing Engine. During this process, the PIM performs framing and line-speed signaling.

When the Dual-port Synchronous Serial PIM is installed in a ScreenOS-based SSG Series security appliance, the dedicated network processor will forward traffic to the SSG Series CPU where traffic decisions are made based upon security policies.

Features and Benefits

The Juniper Networks Dual-port Synchronous Serial PIM provides increased bandwidth capabilities while making effective use of the J Series and SSG Series modular interface slots. Features include:

- Single serial interface supporting RS232, V.35, X.21, RS449, and EIA530
- Up to 8 Mbps per physical port
- Onboard network processor
- Clock rate configurable
- Crypto resynchronization support
- Juniper’s proprietary data terminal equipment (DTE) and data circuit-terminating equipment (DCE) cables available for each protocol (10 in all) with auto-detection for DTE/DCE modes
Specifications

Product Specifications

Interface Specifications
• Transmit Rate: 8 Mbps per port
• Receive bit rate: 8 Mbps per port
• Line Encoding: NRZ, NRZI
• Line Protocols: EIA530, X.21, RS449/RS422, RS232, V35
• Modes: DTE, DCE

Data Interface

High-Level Data Link Control (HDLC) Features
• 56K and 64K mode
• CRC 16/32
• Shared flag
• Idle flag/fill
• Counters: runts, giants, frame check sequence (FCS) error, abort error, align error

Interface Connector

System Timing

• Clocking Modes: DCE, internal, loop
• Clocking Rates: 1.2 KHz, 2.4 KHz, 9.6 KHz, 19.2 KHz, 38.4 KHz, 56.0 KHz, 64.0 KHz, 72.0 KHz, 125.0 KHz, 148.0 KHz, 250.0 KHz, 500.0 KHz, 800.0 KHz, 1.0 MHz, 1.3 MHz, 2.0 MHz, 4.0 MHz, 8.0 MHz

Dimensions and Weight (H x W x D)

• 0.63 x 5.45 x 6.5 in (1.6 x 13.8 x 16.5 cm)

Environmental

Operating temperature: 0 to 40° C
Storage temperature: -40 to 70° C
Relative humidity: 5 to 90% noncondensing

Diagnoses

Loopbacks
• Local, DCE-local

Network Alarms
• Rx clock absent
• Tx clock absent
• Data carrier detect (DCD) absent
• Clear to send (CTS) absent
• Data set ready (DSR) absent

Error Counters
• Controlled slipped seconds (CSS or CS)
• Line errored seconds (LES)
• Errored seconds (ES)
• Bursty errored seconds (BES)
• Severely errored seconds (SES)
• Severely errored framing seconds (SEFS)
• Loss of signal seconds (LOS)
• Loss of frame seconds (LOFS)
• Unavailable seconds (UAS)

LEDs
PIM LEDs indicate port status with the following LED states:

<table>
<thead>
<tr>
<th>Color</th>
<th>State</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green</td>
<td>On steadily</td>
<td>Online with no alarms or failures.</td>
</tr>
<tr>
<td>Red</td>
<td>On steadily</td>
<td>Active with a local alarm; router has detected a failure.</td>
</tr>
</tbody>
</table>

Management Capabilities

Telnet/Console/JWeb: Remote and local configuration, monitoring, and troubleshooting

Standards and Compliance

Safety
• CAN/CSA-C22.2 No. 60950-1-03 - UL 60950-1 Safety of Information Technology Equipment
• EN 60950-1 Safety of Information Technology Equipment EMC (Emissions)
• AS/NZS 3548 Class B
• EN55022 Class B
• FCC Part 15 Class B
• VCCI Class B

Immunity
• EN-61000-4-2 ESD
• EN-61000-4-3 Radiated Immunity
• EN-61000-4-4 EFT
• EN-61000-4-5 Surge
• EN-61000-4-6 Low Frequency Common Immunity

European Telecommunications Standardization Institute (ETSI)
• ETSI EN-300386-2 Telecommunication Network Equipment Electromagnetic Compatibility

Standards
• ITU V.35
• ITU X.21
• EIA/TIA 530

Performance-Enabling Services and Support
Juniper Networks is the leader in performance-enabling services and support, which are designed to accelerate, extend, and optimize your high-performance network. Our services allow you to bring revenue-generating capabilities online faster so you can realize bigger productivity gains, faster rollouts of new business models and ventures, and greater market reach, while generating higher levels of customer satisfaction. At the same time, Juniper Networks ensures operational excellence by optimizing your network to maintain required levels of performance, reliability, and availability. For more details, please visit www.juniper.net/products-services.

Juniper Networks JUNOS® Software Release
The Dual-port Synchronous Serial PIM is supported on J Series routers in JUNOS 7.0 and greater releases.

Juniper Networks ScreenOS Software Release
The Dual-port Synchronous Serial PIM is supported in ScreenOS 5.1 and higher releases on the SSG500 line, ScreenOS 6.0/r2 and higher releases on the SSG300 line, and ScreenOS 5.4 and higher releases on the SSG140.

About Juniper Networks
Juniper Networks, Inc. is the leader in high-performance networking. Juniper offers a high-performance network infrastructure that creates a responsive and trusted environment for accelerating the deployment of services and applications over a single network. This fuels high-performance businesses. Additional information can be found at www.juniper.net.
